Table of Contents

Acknowledgements	iii
Abbreviations	v
Part I: Tuberculosis (TB) Infection Control Overview	1
Preface	3
Introduction	7
Guidelines and Regulations	10
Environmental Controls	15
Using Ventilation to Reduce the Risk of Spreading TB.	15
Natural Ventilation and Fans	16
Using Directional Airflow to Reduce the Risk of Spreading TB.	18
Central Ventilation Systems	24
Using Negative Pressure to Reduce the Risk of Spreading TB	26
Using Ultraviolet Germicidal Irradiation (UVGI) to Reduce the Risk of Spreading TB	37
Upper Air UVGI And High-efficiency Particulate Air (HEPA) Filter Units.	38
Part II: Infection Control In Specific Settings and Procedures	47
Clinics	49
Facility Risk Assessment	51
Responsibility	53
Employee Categories at Risk	54
Administrative Controls	54
Environmental Controls	66
Respiratory Protection	71
TB Infection Control Plan Evaluation	72
Sputum Induction	73
About Sputum Induction	74
Administrative Controls	75
Environmental Controls	77
Respiratory Protection	81
Performing Sputum Induction	82
Summary of Sputum Induction Environmental Controls	86
Airborne Infection Isolation Rooms	87
Designing a New State-of-the-Art Airborne Infection Isolation Room (AIIR) ..	89
Assessing an Existing AIIR	96
Upgrading or Converting an Existing Room	101

Emergency Departments	113
Determining the Likelihood of TB Transmission in the Emergency Department (ED)	115
Implementing and Performing TB Triage	120
Handling Suspect TB Patients in the ED	125
The ED Waiting Room — A Port of Entry	127
Homeless Shelters	131
Background and Needs Overview.	132
Why TB is a Problem in Homeless Shelters.	133
Reducing the Risk of Spreading TB in Homeless Shelters.	134
Appendices	139
A. How to Calculate Conversion Rates.	141
B. Emergency Department TB Triage Evaluation Worksheet.	143
C. Airborne Infection Isolation Room Pressure Monitor Checklist	145
D. Early Detection of TB Questionnaire.	146
E. TB Screening Questionnaire for Healthcare Workers	147
F. Risk Assessment Worksheet.	149
G. Room Clearance Time Calculation Worksheet.	150
H. Summary of Ventilation Units Worksheet	152
I. TB Infection Control Training Record	154
J. Triage Criteria for Respiratory Isolation	155
K. What Does Air Change Mean?	156
L. Sample Signs	157
Glossary	168
Resources	170
References	171

Acknowledgements

The following individuals are gratefully acknowledged for their invaluable participation and guidance in this project:

Janet Abernathy, RN, BSN

Manager, Clinical Quality

San Ramon Regional Medical Center
San Ramon, CA

James Dunham, PE, BME, MSME

Senior Engineer

Oldham Engineering
Berkeley, CA

Cynthia Fine, RN, MSN, CIC

Infection Control/Employee Health Director

San Ramon Regional Medical Center
San Ramon, CA

Cynthia Gozun, RN, BSN

Nurse Manager

San Francisco Tuberculosis Control Section
Department of Public Health
San Francisco, CA

Paul A. Jensen, PhD, PE, CIH

Captain, U.S. Public Health Service

Engineer Director

Division of Tuberculosis Elimination
Centers for Disease Control and Prevention (CDC)
Atlanta, GA

L. Masae Kawamura, MD

Director/TB Controller

San Francisco Tuberculosis Control Section
Department of Public Health
Co-Principal Investigator
Curry International Tuberculosis Center
San Francisco, CA

Lauren Lambert, MPH

Epidemiologist

Division of Tuberculosis Elimination
Centers for Disease Control and Prevention (CDC)
Atlanta, GA

Patrick MacArdle, PE

Project Manager

University of California, Berkeley Capital Projects
Berkeley, CA

Masa Narita, MD

TB Control Officer

Public Health – Seattle & King County
Seattle, WA

Eve Rubell, MPH

Director, Training and Education

Homeless Health Care Los Angeles
Los Angeles, CA

Robert G. Smith

Senior Health Educator

Homeless Health Care Los Angeles
Los Angeles, CA

Document prepared by:

Betty Gore, RN, MSN, CIC

Retired Nurse Consultant

TB/Infection Control Program
South Carolina Department of
Health and Environmental Control
Past President of NTNCC
Past President of APIC-Palmetto
Charleston, SC

Kelly Smith, MPH

Program Manager

Curry International Tuberculosis Center
San Francisco, CA

Graphic Design:

Edi Berton Design

The following organizations were instrumental in creating the original products which were incorporated into this Manual:

- Alameda County Public Health Department
- Boston Public Health Commission
- Broad Street Solutions, San Diego
- California Department of Health Services
- California Office of Statewide Health Planning and Development
- Cardio-Pulmonary Department, San Mateo County General Hospital
- Catholic Healthcare West
- Centers for Disease Control and Prevention
- Contra Costa Regional Medical Center
- Department of Emergency Medicine, Olive View-UCLA Medical Center
- Division of Tuberculosis Control, Los Angeles County Department of Health Services
- Fresno County Human Services System
- Harvard Medical School, The Cambridge Hospital, and Massachusetts Department of Public Health, Boston
- Homeless Health Care Los Angeles
- Housing Authority of Portland, Oregon
- Institute for Medical Quality
- Institutional Consultation Services, Curry International Tuberculosis Center
- Kaiser Permanente, Walnut Creek
- Missouri Department of Health, Section of Vaccine-Preventable and Tuberculosis Disease Elimination, Jefferson City, Missouri
- Oldham Engineering, Berkeley, CA
- Oregon Health Division
- Palo Alto Medical Foundation
- Austin/Travis County Health Department
- Sacramento County Department of Health and Human Services Public Health Promotion and Education
- San Diego County Health and Human Services
- San Francisco Department of Health
- San Joaquin County Public Health Services
- San Mateo County General Hospital
- School of Public Health, University of California at Berkeley
- Ted Jacobs Engineering Group, Oakland, California
- Texas Department of Health
- The Bromeen Group
- The Cotton Group
- The Salvation Army Bell Shelter, Bell, California

Abbreviations

Organizations

AIA	American Institute of Architects
ANSI	American National Standards Institute
ASHRAE	American Society of Heating, Refrigerating, and Air Conditioning Engineers, Inc.
Cal/OSHA	California Division of Occupational Safety and Health (California OSHA)
CDC	Centers for Disease Control and Prevention (a Federal agency)
CMC	California Mechanical Code
CITC	Curry International Tuberculosis Center
FDA	US Food and Drug Administration (a Federal agency)
MMWR	Morbidity and Mortality Weekly Report
NIOSH	National Institute for Occupational Safety and Health (a Federal agency)
OSHA	Occupational Safety and Health Administration (a Federal agency)
OSHPD	Office of Statewide Health Planning and Development (a California agency)

Terms

ACH	Air changes per hour	LTBI	Latent tuberculosis infection
AFB	Acid-fast bacilli	<i>M. tb</i>	<i>Mycobacterium tuberculosis</i>
AIDS	Acquired immunodeficiency syndrome	MDR	Multidrug-resistant
AIIR	Airborne infection isolation room	NAAT	Nucleic acid amplification test
BAMT	Blood assay for <i>Mycobacterium tuberculosis</i>	NTM	Nontuberculous mycobacteria
BCG	Bacille Calmette-Guérin (vaccine)	PIN	Policy intent notice
CFM	Cubic feet per minute	PPD	Purified protein derivative
DOT	Directly observed therapy	QFT-G	QuantiFERON®-TB Gold blood test
FPM	Feet per minute	RIPT	Respiratory isolation of pulmonary tuberculosis
HCW	Healthcare worker	RTMCC	Regional Training and Medical Consultation Center
HEPA	High efficiency particulate air	TB	Tuberculosis
HIV	Human immunodeficiency virus	TST	Tuberculin skin test
HVAC	Heating, ventilating, and air conditioning	UV	Ultraviolet
ICP	Infection control plan	UVGI	Ultraviolet germicidal irradiation
IGRA	Interferon gamma release assay	VAV	Variable air volume
INH	Isoniazid	" W.G.	Inches of water gauge
LEV	Local exhaust ventilation	XDR	Extensively drug-resistant
